

G 29. (Amended) The composition of claim 27, wherein the adhesion promoter includes a (meth)acrylate ester of phosphoric acid [based compound].

Please delete claim 30 without prejudice or disclaimer.

G 30. (Amended) The composition of claim [30] 27 wherein said composition, after cure, has a dielectric dissipation factor at 60 Hz and 150°C of lower than about 0.05.

49. (Thrice Amended) A radiation curable composition comprising:

- (a) an acrylate functional urethane oligomer having a hydrocarbon backbone;
- (b) one or more polyfunctional diluents;
- (c) a (meth)acrylate ester of phosphoric acid.
- (d) optionally one or more light sensitive radical generating compounds;
- and
- (e) one or more monofunctional diluents;

wherein said composition, after cure, has a dielectric dissipation factor at 60 Hz and 150°C of lower than about 0.2.

Please add new claims 50-53.

G 50. (New) The composition of claim 49, wherein said composition, after cure, has a dielectric dissipation factor at 60 Hz and 24°C of lower than about 0.05.

G 51. (New) The composition of claim 49, wherein said composition, after cure, is able to withstand immersion in oil for 28 days at 150°C.

G 52. (New) The composition of claim 27, wherein said composition, after cure, is able to withstand immersion in oil for 28 days at 150°C.
